Description of the verification :

Scope :
Verification objectives :

Level of assurance :
Materiality threshold :
Intended users
of the GHG statement:
Nature of data and
information supporting
the GHG statement :
GHGs included :
Category b

Sub-category emissions information contained in this statement

Category Description		Quantified	Emissions(tCO ₂ e)
Category 1 Direct GHG emissions and removals			24,189.66
Category 2 Indirect GHG emissions from imported energy			272,661.80 (Location-based)
			122,515.41 (Market-based)
Total (Location-based grid emission factor)			296,851
Total (Market-based grid emission factor)			146,705
